Call for Symposia

The IAFP European Symposium Organising Committee invites interested individuals to submit a symposium proposal for presentation during the IAFP European Symposium on Food Safety, 21–23 May 2012 in Warsaw, Poland. **Symposium proposals are due 29 November 2011.**

What is a Symposium?

A **symposium** is an organized, 1 ½-hour session emphasizing a central theme relating to food safety and usually consists of three presenters each giving 30-minute presentations.

Symposia may include a discussion emphasizing a scientific aspect of a common food safety and quality topic, issues of general interest relating to food safety and microbiological quality, a report of recent developments, an update of state-of-the-art methodologies, or a discussion of basic and applied research in a given area. The material covered should include current work and the newest findings. Symposia will be evaluated by the Organising Committee for relevance to current science and to Association members. Proposals may be prepared by individuals, groups of individuals, committees or IAFP Professional Development Groups (PDGs).

Submission Instructions

To submit a proposal, read all the information in this Call for Symposia, paying close attention to the “Selection Procedure” on the next page, then completing your Proposal by filling out the form found on the IAFP website and E-mailing it to thuffman@foodprotection.org no later than **29 November 2011**. Follow all instructions when making a submission. Your suggested presenters need not be confirmed at this time, only identified for review consideration.

Proposal Deadline

Proposals must be submitted by filling out the out the form found on the IAFP website and E-mailing it to thuffman@foodprotection.org no later than **29 November 2011**. Organizers will be notified of the status of their proposal by 15 December 2011. The Organising Committee reserves the right to reject poorly organized proposals, to review them, including proposed subjects and speakers, and make modifications based on providing the most comprehensive and balanced overall program.

Presenters

The International Association for Food Protection does not reimburse presenters for travel, hotel, or other expenses incurred during the European Symposium on Food Safety. However, presenters who are not IAFP members will receive a complimentary Symposium registration.

Travel Support

The International Association for Food Protection Foundation has limited funds for travel support of presenters. After final acceptance of the proposal (December 2011), organizers will receive an application form to apply for travel support for presenters. Requests are reviewed on an individual and first-come first-served basis until the funds are depleted. A maximum of €750 per presenter may be available. Organizers are welcome to seek funding from other sources and the Association will provide recognition

for these supporters in our program materials. Organizers are asked to inform the Association if they obtain outside funding.

Selection Procedure

The primary focus of the proposal selection procedure is to provide a balanced educational program for attendees of the IAFP European Symposium on Food Safety. To achieve this goal, proposals may be modified by the Organising Committee during their initial or final review, as appropriate, to prevent overlap of topics among competing sessions. The Organising Committee also reserves the right to suggest alternative speakers and/or topics in an effort to round out the program. During the selection process, only the most relevant and promising proposals will be selected for further development.

Guidelines for Tentative Acceptance:

1. Proposals must be pertinent to IAFP members. Priority will be given to proposals that address one or more of the following program areas:
 - Safety and Microbial Quality of Foods (dairy, meat and poultry, seafood, produce, water)
 - Viruses and Parasites, Retail Food Safety, Epidemiology and Public Health
 - Non-microbiology Food Safety Issues (food toxicology, allergens, chemical contaminants)
 - General-applied Food Safety Microbiology (advances in sanitation, laboratory methods, quality assurance, food safety systems)
 - General-food Protection for the Future (risk analysis, emerging pathogens, biotechnology, predictive models, etc.)
 - Developments in Food Safety Education
 - Other pertinent food protection topics may be considered if space is available
2. In addition to addressing pertinent program areas, proposals accepted for further development should:
 - Be new, emerging and/or address areas not covered in last 2 years
 - If covered in last 2 years, provide new information that warrants another session
3. Submissions must include:
 - Titles that clearly convey the topics to be covered
 - Topics that are unique to prevent overlap of basic information among speakers
 - Names of suggested speakers from a variety of backgrounds, such as industry, regulatory, academic researchers, or consumer perspective (as appropriate)
 - Suggested speakers who are knowledgeable and good communicators
4. Special consideration will be given to submissions that:
 - Are directly applicable or provide viable safety options for food manufacturers, including small- to medium-size manufacturers
 - Attract or involve students
5. Other considerations for selecting proposals for further development:
 - The Organising Committee reserves the right to limit the number of sessions devoted to a single topic area to provide a balanced program.
 - If relevant topics are proposed by more than one submission, the Organising Committee will make the final decision to combine or modify proposals as appropriate to avoid overlap of topics among competing proposals. In this case, organizers may be asked to work with one another to combine proposals.

- Due to space and time limitations, only the most relevant and promising proposals will be selected for further development. Again, the Organising Committee will make final decisions regarding symposium breadth and length.
- Additional sessions may be added at the discretion of the Organising Committee to accommodate emerging issues.
